Made for Play

This Chastain Park home's man cave was architecturally designed by **Handcrafted Homes, Inc.** for all-day play and everyday ease. The cocktail bar features repurposed oak cabinetry and black iron accents with natural stone flooring throughout the room. An empty space under the staircase was converted into a stunning wine cellar housing a custom-made mahogany shelving unit that holds more than 460 bottles. The cellar is enclosed by an elegant glass door framed in black powder-coated metal designed by Paul Farber of The Farber Company, LLC. <https://handcraftedhomes-inc.com>
